Go 1 mind map

Go 1
1.1 What a crowd is, and why it matters
A crowd
Event phases
Stock and flow
Not panic
1.2 Space, density and level of service
Density
How it feels
Levels of service
Holding capacity
1.3 Speed, flow and the fundamental diagram
J = ρ × v
Speed–density
Fundamental diagram
Not universal
1.4 Bottlenecks and capacity
Find it
Capacity
Queues
Zipper and place
1.5 Self-organisation: lanes, oscillations and waves
Lanes
Oscillations
Stop-and-go
Signals
1.6 People, not particles: behaviour and choice
Familiar exits
Groups
No mass panic
Information
1.7 When crowds become dangerous
Density and risk
Crowd pressure
Four disasters
Break the chain
1.8 Planning and managing safe crowds
DIM-ICE
RAMP
Exit width
On the day

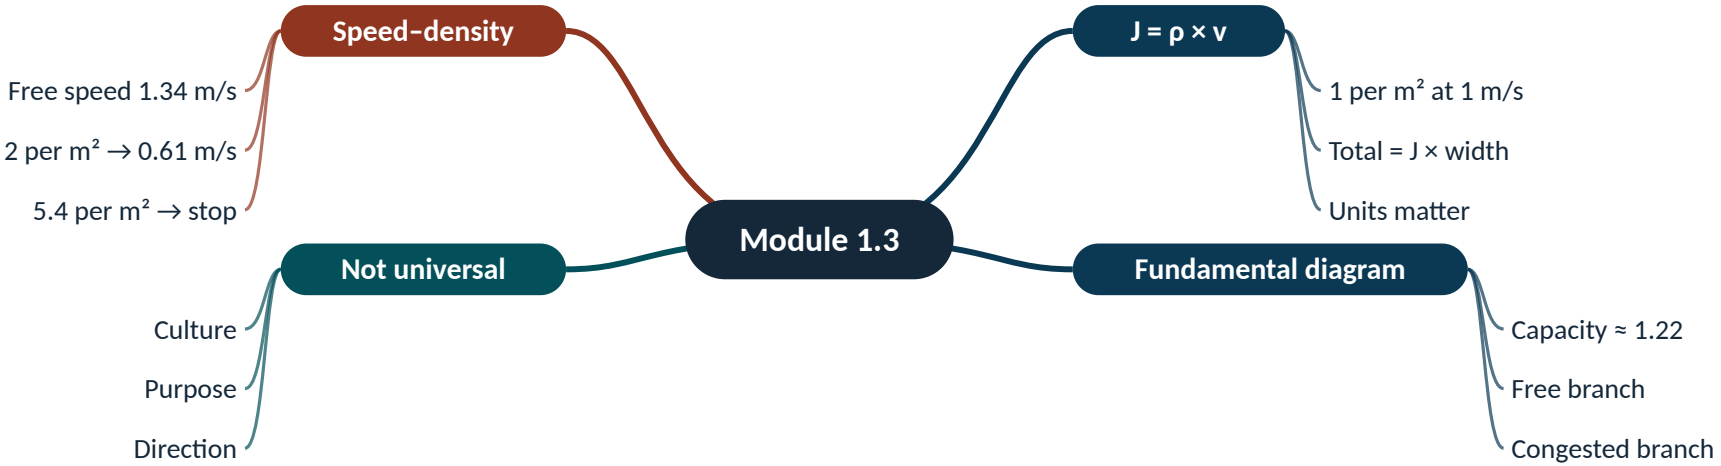

1.1 What a crowd is, and why it matters
